And you could get ahold of him and flip the PDH out. That's interesting, isn't it? In other words, you can take them out as fast as they lay them down.

Therefore, we really do have the remedy before the assault weapon is produced.

It's all right in this offhand age to just brush things aside and say, "Well, it's of no importance. No importance, really, and let's not be dramatic the way people are being about the atom bomb." Actually the atom bomb isn't as serious as this other. It's just a MEST weapon. No, it was just a simple, clear-cut statement. It presupposed one thing—that something *could* be done. A presupposition.
